

Treasury & Cash Oslo 2016

published on 20.04.2016

April 21, 2016 Oslo, Norway

Pressure is continuously increasing through the Treasury and Cash function: Increased process efficiency, better working capital management, proactive cash management and stronger ties between treasury and trade finance.

In addition to this, the Treasury and Cash function finds itself working on an increasingly regulated market ? a balancing act that demands a lot of knowledge, experience and drive.

At **Treasury & Cash Oslo 2016** you will get the chance to listen to those who have succeeded with this balancing act.

At this event, you will have the opportunity to network with Nordic and international players. Presentations, leading case studies and panels will be presented.
