

SWIFTNet

published on 11.01.2018

SWIFTNet is a multi-bank and multi-country network that enables secure communication with all your banks worldwide through a single standard protocol.

Description

SWIFTNet, the international network hosted by SWIFT, enables secure communication with all your banks worldwide through a single standard protocol.

BNP Paribas is certified 'Bank ready For Corporate Access' by SWIFT. Check our SWIFT capabilities on the [Bank Readiness Portal](#).

BNP Paribas' SWIFTNet solution can be combined with:

- Our web portal to approve payments online and get their status in real time
- Our solutions for security, data encryption and digital signature
- Our full range of reporting and payment traceability services
